Help Notes

DVD standard transfer

Our standard transfer service means that everything on your reel is transferred onto the tape or disk format you choose with no editing and includes a single menu containing up to four navigation buttons per disk. If you need more navigation buttons, enter the number you require in the additional editing services section of this form.

Mini DV

We can provide a safety copy of your cine transfer on high quality mini DV tape; this also gives you the option of editing your films at a later date. Mini DV is also an excellent way of safely storing your precious films for the future with a tape capacity of 60min.

Editing on Computer

If you are editing your films on your computer at home we can transfer them onto your own portable hard drive in a file format for you to keep. Just send or bring the drive with your order and tell us what file format you require - PC or Mac. Alternatively we can supply your films already loaded onto a drive. We will then send the hard drive to you together with your films. You then simply connect and download your files onto your computer.

Navigation Button

We can add more navigation buttons to your DVD menu so you can easily move to another part of your disk. The button shows a still picture from the selected part of the film and it can include your choice of caption with up to 20 characters.

Time Manager

Sometimes film reels are not labelled with places and dates and it can be hard for you to decide the running order and chapter titles for your DVD. The 'TIME MANAGER' service will help. All you need to do is send your unmarked films to us and we will send you back a DVD containing all your reels. Between each reel a numbered caption appears to show where each new reel starts. This is so that you can see when the reels change. A simple form comes with the DVD for you to fill in with the new running order for your films and your choice of titles for each reel/chapter. You can also tell us to combine reels to run together with no breaks. From your information we will edit the reels into your preferred order with chapters and produce and send you the final DVD. If you want to re arrange the order of your films AND edit out some sections of your films then see our EDIT MANAGER SERVICE

Edit Manager

If you want us to edit your films to rearrange the running order AND remove unwanted sections we will provide you with a DVD copy of your film reels. Between each reel a numbered caption appears to show where each new reel starts. This is so that you can see when the reels change. We also add a VISUAL TIMER in the picture so you can easily tell us which sections you would like removed. If you do not want to remove sections of your films but would just like to change the running order see our TIME MANAGER SERVICE.

Background Music

For films without a soundtrack we can transfer your films and include easy listening background music, which is ideal for silent films. Go to the 'movie archive' to see some examples of silent films with music added.
